-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 & 8-45 are rejected under 35 U.S.C. 102(b) as being anticipated by the Zenographics SuperPrint manual.

Re claims 1, 8-11, 24, & 29-32, the SuperPrint manual discloses (pages 2-4 & 3-9) a print control system in which a print dialog box is displayed (page 2-4) with options for displaying and modifying print settings and then confirming and issuing (the "OK" button) the print job. In the case where a bitmap printer is selected from this dialog box, a printing information dialog box is displayed after confirming the print job (page 3-9). This printing information dialog box displays a modifiable synopsis (consisting of the output file name) used to direct the print job to an output file until the job has been finished.

Re claim 2, the print dialog box includes settings for a printer and a number of copies to be printed.

Art Unit: 2624

Re claim 3 & 27, the print dialog box includes a "cancel" button to cancel the print job.

Re claims 4-6, 13-15, 18-24, 25-28, 34-36, & 39-45, the printing information dialog box has "OK" and "cancel" buttons to respectively enable and issue (either for a first time or for an additional instance) and cancel the print job.

Re claim 12, 16, 19, 33, 37, & 40, the printing information dialog box enables the editable selection of an output file, which is readable upon the (not further described) "print selection device".

Re claim 17-24 & 38-45, the "resubmission" of a print job by repeating the steps of submitting the original print job again follows the described steps (displaying the print dialog box again, selecting settings in the new print dialog box, confirming the settings by selecting the "OK" button in the print dialog box, displaying the printing information dialog box again, selecting the output file in the printing information dialog box, and issuing the print job by selecting the "OK" button in the printing information dialog box).

Allowable Subject Matter

3. Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent

Art Unit: 2624

form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:

Re claim 7, the art of record does not teach or suggest the display of the listed settings (including all of printer name, printer ports, timeout settings, color management, output printer settings, banner settings, paper selection, document size, print size, paper type, printer tray, print resolution, edge smoothing flags, toner savings flag, graphics configuration, accessories, statistics, and watermark properties) in a printing information dialog box that is displayed after print settings have already been entered and confirmed in an initial print dialog box.
